ARSENAL® is a registered trademark of BASF.
PRECAUTIONS

IMPORTANT:
KEEP OUT OF REACH OF CHILDREN.

Avoid contact with skin, eyes or clothing.

Wear chemically resistant gloves when using ARSENAL herbicide. Wear a long sleeve shirt and long pants during mixing, loading, application, cleanup and repair.

Avoid breathing spray and mist.

Use with adequate ventilation.

Do not contaminate any water body or apply to any area not specified on the label.

Wash thoroughly with soap and water after handling.

Remove contaminated clothing and wash separately from household laundry before reuse.

FIRST AID

If swallowed: Call a poison control centre or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by a poison control centre or doctor. Do not give anything by mouth to an unconscious person.

If on skin or clothing: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15–20 minutes. Call a poison control centre or doctor for treatment advice.

If inhaled: Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably by mouth-to-mouth, if possible. Call a poison control centre or doctor for further treatment advice.

If in eyes: Hold eye open and rinse slowly and gently with water for 15–20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control centre or doctor for treatment advice.

Take container, label or product name and Pest Control Product Registration Number with you when seeking medical attention.

TOXICOLOGICAL INFORMATION

Treat symptomatically.
STORAGE

DO NOT contaminate water, food, seed or feed by storage or disposal.

Keep containers closed to avoid spills and contamination.

Store at temperatures above -12°C.

ARSENAL herbicide should not be mixed or stored in unlined steel (except stainless steel) containers or spray tanks.

DISPOSAL

For Recyclable Containers
Do not reuse this container for any purpose. This is a recyclable container, and is to be disposed of at a container collection site. Contact your local distributor/dealer or municipality for the location of the nearest collection site. Before taking the container to the collection site:

1. Triple- or pressure-rinse the empty container. Add the rinsings to the spray mixture in the tank.

2. Make the empty, rinsed container unsuitable for further use.

If there is no container collection site in your area, dispose of the container in accordance with provincial requirements. For information on the disposal of unused, unwanted product contact the manufacturer or the provincial regulatory agency. Contact the manufacturer and the provincial regulatory agency in case of a spill, and for clean-up of spills.

For Non-Returnable Containers
1. Triple- or pressure-rinse the empty container. Add the rinsings to the spray mixture in the tank.

2. Follow provincial instruction for any required additional cleaning of the container prior to its disposal.

3. Make the empty container unsuitable for further use.

4. Dispose of the container in accordance with provincial requirements.

5. For information on disposal of unused, unwanted product, contact the manufacturer or the provincial regulatory agency. Contact the manufacturer and the provincial regulatory agency in case of a spill, and for clean-up of spills.
NOTICE TO USER

This pest control product is to be used only in accordance with the directions on the label. It is an
offence under the *Pest Control Products Act* to use this product in a way that is inconsistent with
the directions on the label. The user assumes the risk to persons or property that arises from any
such use of this product.

WARNING

DO NOT apply by air. For ground application only.

DO NOT use on food or feed crops. CAUTION: DO NOT graze the treated area or cut for hay;
sufficient data are not available to support such use.

DO NOT apply where runoff water may flow onto agricultural land as injury to crops may result.
Keep from contact with fertilizers, insecticides, fungicides and seeds.

Keep ARSENAL herbicide away from areas where tree roots may extend into the treated area or
in locations where the chemical may be washed or moved into contact with their roots (maintain a
distance from the tree equal to at least twice the distance from the tree trunk to the dripline).

DO NOT use on lawns, walks, driveways, tennis courts, or similar areas. Prevent drift of spray to
desirable plants.

DO NOT contaminate ponds, lakes, streams, wetlands or sloughs and do not apply within 15
metres of a wetland area or body of water.

Thoroughly clean all traces of ARSENAL herbicide from application equipment immediately after
use. Flush tank, pump, hoses and boom with several changes of water after removing nozzle tips
and screens (clean these parts separately). Drain and flush equipment away from desirable trees
and plants. Do not contaminate water when disposing of equipment wash waters.

This product is to be applied by licensed applicators only.

GENERAL INFORMATION

ARSENAL herbicide is an aqueous solution containing surfactant to be mixed in water and
applied as a spray for season long control of most annual and perennial grasses and broadleaf
weeds on non-cropland areas.

ARSENAL herbicide must be applied post-emergence to the weeds. For maximum activity,
weeds should be growing vigorously at the time of post-emergence applications.
ARSENAL herbicide is readily absorbed through foliage and roots and is translocated rapidly throughout the plant. Treated plants stop growing soon after spray application. Chlorosis appears first in the newest leaves, and necrosis spreads from this point. In perennials, the herbicide is translocated into, and kills, underground storage organs, thus preventing regrowth. Chlorosis and tissue necrosis may not be apparent in some plant species until two weeks after application. Complete kill of plants may not occur for several weeks.

**WEEDS CONTROLLED**

ARSENAL herbicide will provide season long control of most annual and perennial grass and broadleaf weeds including the following species:

<table>
<thead>
<tr>
<th>Annual Broadleaf Weeds</th>
<th>Annual Grass Weeds</th>
</tr>

**DIRECTIONS FOR USE**

**Application Sites**
A post-emergence application of ARSENAL herbicide can be used to control most annual and perennial grasses and broadleaf weeds on the following non-crop, non-graze areas: industrial sites, railroad ballast, spot application treatment for rail and hydro rights-of-way and stations associated with pipeline rights-of-way including well sites, battery stations, and compressor or valve stations. Do not contaminate ponds, lakes, streams, wetlands or sloughs and do not apply within 15 metres of a wetland area or body of water.

**Rate**
Apply 3.0 L ARSENAL herbicide per hectare. For small areas apply 30 mL per 100 m² (see Table for examples).

<table>

**MIXING INSTRUCTIONS**
Mix the proper amount of ARSENAL herbicide in water in the spray tank with the agitator running.

A foam reducing agent may be added at the recommended label rate, if needed.

**EQUIPMENT**
High volume spray equipment: high pressure handguns and vehicle mounted high volume directed spray equipment

For best results, apply ARSENAL herbicide using the least amount of water practical to obtain uniform coverage of the vegetation foliage. Using excessive spray volumes which may cause runoff from the plant foliage may result in reduced performance. Apply uniformly with properly calibrated ground equipment in 100 - 550 litres of water per hectare with a spray pressure of 175 kPa - 425 kPa.

If using spray volumes greater than 550 litres per hectare, additional nonionic surfactant must then be added at a rate of 1 litre/400 litres of spray solution to provide optimum wetting and/or contact activity. A foam reducing agent may be added at the recommended label rate, if needed.
Boom: conventional boom mounted, manifold mounted, and off-centered nozzles

Mix the recommended amount of ARSENAL herbicide in 100 - 550 litres per hectare in the spray tank with the agitator running. A foam reducing agent may be added at the recommended label rate if needed.

Low volume hand held equipment

Backpack, knapsack, and other pump-up type pressure sprayers and backpack mist blowers used to direct applications to weed foliage.

FORESTRY SITE PREPARATION

APPLICATION SITE

ARSENAL herbicide can be used as a directed, spot or strip spray application for site preparation prior to planting spruce seedlings in the Boreal Forest Region only.

Effects of ARSENAL herbicide are slow to appear on target plants with maximum effectiveness generally being apparent more than one full growing season after treatment.

ARSENAL herbicide should be applied at least (6) months prior to planting spruce seedlings or injury may occur. Reentry Interval: DO NOT reenter treated area within 12 hours after application.

Consult local pesticide authorities about use permits which may be required.

SPECIES CONTROLLED

Aspen and bluejoint reedgrass.

RATE AND EQUIPMENT

When making directed or spot spray applications with low volume hand application equipment thoroughly mix a 2.5% solution of ARSENAL herbicide in water. Treat up to one half (1/2) the total area of the site preparation area by applying spots or strips to create planting sites. Evenly apply 8 ml of mixture per square meter of treated spot.

When making spot or strip applications using ground application equipment apply 2.08 L of ARSENAL herbicide in 75 to 100 L of mixture per treated hectare. Equipment should be configured to treat spots or strips totaling no more than one half (1/2) of the treatment unit (cut block plantation opening).
RESISTANCE MANAGEMENT RECOMMENDATIONS

For resistance management, ARSENAL herbicide is a Group 2 herbicide. Any weed population may contain or develop plants naturally resistant to ARSENAL herbicide and other Group 2 herbicides. The resistant biotypes may dominate the weed population if these herbicides are used repeatedly in the same field. Other resistance mechanisms that are not linked to site of action, but specific for individual chemicals, such as enhanced metabolism, may also exist. Appropriate resistance-management strategies should be followed.

To delay herbicide resistance:

- Where possible, rotate the use of ARSENAL herbicide or other Group 2 herbicides with different herbicide groups that control the same weeds in a field.

- Use tank mixtures with herbicides from a different group when such use is permitted.

- Herbicide use should be based on an IPM program that includes scouting, historical information related to herbicide use and crop rotation, and considers tillage (or other mechanical), cultural, biological and other chemical control practices.

- Monitor treated weed populations for resistance development.

- Prevent movement of resistant weed seeds to other fields by cleaning harvesting and tillage equipment and planting clean seed.

- Contact your local extension specialist or certified crop advisors for any additional pesticide resistance-management and/or integrated weed-management recommendations for specific crops and weed biotypes.

- For further information or to report suspected resistance, contact BASF at 1-877-371-2273.
